

How to save energy

KEY IDEAS

REDUCE FLOW

Using a flow restricting water fitting to reduce your hot water usage

SHOWER INSTEAD

Showering reduces your hot water usage significantly

GO RENEWABLE

Upgrade your water heater to solar, gas or a heat pump

REDUCE TEMP

Reduce the geyser temperature to 55° in Summer and 60° in Winter or even less if you can

TIMER SWITCH

Use an Electronic timer to regulate when your geyser is switched on

CLASS B

Upgrade your old geyser to a Class B, the most efficient water heater on the market

POINT OF USE

Use a Point of Use water heater in area's far from the geyser to reduce water and energy wastage

WRAP / COVER

Insulate your hot water pipes to reduce heat loss and cover your geyser with additional insulation

The best way to save energy is to use less hot water
